PARTS, SALES, AND SERVICE

K&L specializes in machinery maintenance and repair services for heavy equipment, namely, cranes, draglines, drilling rigs, mud pumps, rock crushers, tub grinders, dredges, stationary and mobile power units, and marine units; Machinery maintenance and repair services for heavy off-highway equipment, namely, mining equipment, construction equipment, road building equipment, agricultural equipment, waste management equipment, marine equipment, oil and gas equipment, pumping and irrigation equipment, forestry equipment; and lift equipment., along with on-site repair, removal and reinstallation of heavy equipment power transmissions and drivetrains.

K&L has their own remanufacturing exchange programs in the nature of installation and replacement of heavy equipment power transmissions and drive trains with OEM products. We remanufacture and rebuild of heavy equipment power transmissions and drivetrain products that have been worn or partially destroyed. We have transmission up-fit and repackaging services in the nature of transmission repair, rebuilding and installation services for engine manufacturers, distributors, wholesalers, OEMs and end-users.

We have in-shop repair services for heavy equipment, namely, transmissions, cranes, draglines, drilling rigs, mud pumps, rock crushers, tub grinders, dredges, stationary and mobile power units, and marine units.

K&L does both manufacturing and installation of heavy equipment - transmissions, cranes, draglines, drilling rigs, mud pumps, rock crushers, tub grinders, dredges, stationary and mobile power units, torque converters, power take-offs (PTOs), and marine units.
