

Job description

Great Lakes Power Service – Mechanic / Service Technician for Marine, Off-Highway & Industrial Equipment.

Job Purpose/Performance Outputs:

Perform field and in-shop service, repair & rebuild of heavy-duty diesel powertrain equipment. Ability to troubleshoot equipment and specific units for electrical, mechanical, and hydraulic problems or failures. Includes inboard marine transmissions, water jets, off-highway powershift transmissions, axles, power take-offs and torque converters. Communicates often, effectively and makes safety a priority.

Essential Functions Performed (Other functions/tasks may be required besides those listed):

- Performs failure analysis on transmissions, jet drives, axles, or other units. Complete with written/typed detail of the failure, its possible cause, picture evidence, and necessary repairs.
- Completes & submits accurate parts list of needed items for repair to the office for purchase.
- Performs complete unit teardown, cleaning, inspection, rebuilding, and testing of all power-train products.
- Travels to customer locations to inspect, troubleshoot and repair customer equipment.
- Troubleshooting and installation of electrical controls and components

Core Job Competencies (skills, knowledge, abilities) Required:

(Other skills may also be required.)

- Mechanical, electrical and hydraulic aptitude and knowledge. Capable of a wide range of troubleshooting, testing and rebuilding of transmissions, axles, electrical and mechanical equipment
- Blueprint / Drawing reading capability
- Minor Welding Ability, use of a torch and large press
- Knowledge of diesel equipment instrumentation and gauges and testing processes
- Has great attention to detail and safety
- Technical translation of mechanical product, operation, repair, and maintenance items to customers
- Communication skills, verbal and listening, and phone skills
- Very good interpersonal skills/ability to work well with others
- Decision making skills in selecting appropriate service needs and applications
- Behavior flexibility in dealing with both external customer situations and internal support staff

Job Prerequisites (needed upon job entry) - Position:

Minimum Education Level, Type, Certification:

Toolbox – basic hand tools

High School Diploma and/or Tech School Graduate

Specific Experience - Amount and Type

- 3+ years mechanical repair experience
- 2 to 3 years' experience in servicing customers

Job Conditions/Requirements - Hours, Travel, Physical, Tools, etc

- Occasional on-call for customer repairs
- Occasional travel, including overnight travel
- Product repair certifications – travel to manufacturers technical training
- Valid driver's license
- Varying hazardous job conditions and safety apparel required

Compensation & Benefits:

- Great Lakes Power offers excellent hourly pay (based on experience), available overtime, and paid vacation.
- 401K Retirement Plan
- Medical Insurance
