## **GROUND BREAKING CEREMONY KICKS OFF CONSTRUCTION FOR GREAT LAKES POWER'S NEW WORLD HEADQUARTERS**

Mentor, OH – July 14, 2021 – Mentor Ohio-based Great Lakes Power Products celebrated the beginning of the construction phase of the Company's new World Headquarters located in Madison Village, Ohio, with a ground breaking ceremony.

Great Lakes Power's new state-of-the-art 150,000 square foot facility will be located at 1973 Great Lakes Way, a new road being constructed, at Interstate 90 and State Route 528 in Madison Village. The industrial park is named Grand River Gateway and initially will be home to Great Lakes Power and a Love's Travel Stop.

Lakeland Construction is the contractor and will head up the construction of the new headquarters and new Great Lakes Way Road.

"The new facility will consolidate our administrative, service, manufacturing, and warehousing operations from both our current Mentor and Perry, Ohio facilities. It will not only provide us the necessary room for future growth, but will also create cost saving synergies" said Harry Allen III, Vice President and Chief Engineer of Great Lakes Power.

Harry Allen Jr., Chairman of Great Lakes Power added "This project is the largest single investment in the history of Great Lakes Power and my sons Harry III, David and Stephen and daughter Andrea have worked diligently to see this project come to fruition. We are delighted to be able to call Madison Village our new home and look forward to celebrating the Company's 50<sup>th</sup> anniversary in 2023 at our new World Headquarters.

The Great Lakes Power group of companies represents leading global off-highway power transmission, drive train material handling equipment and other related industrial component manufacturers. They include Twin Disc, Dana, Marine Travelift, Shuttlelift, Spicer, Hamilton Jet, Clark-Hurth, Funk Manufacturing, Durst, Cotta Transmission, TDI, Axletech, Carraro, Wichita Clutch, Kongsberg Automotive, Interlube, Donaldson, and Racor. Great Lakes Power also manufactures specialty material handling straddle carriers and transmission test benches whose production will be moved to the new Madison facility. The Company's success lies in its ability to leverage its key strengths of distribution, manufacturing, engineering and service to solve customer's power transmission, material handling, manufacturing, application assistance and service requirements.
