MATERIAL HANDLING

THE *SINGLE BEST* ALTERNATIVE TO OTHER LIFTING METHODS

The **SB series** is ideally suited to today's marketplace, in which components are getting longer, tandem picks are becoming more common, and plant managers are looking for a more cost-effective way to do business. With just a single traversing beam and single hook, any load inside the plant can be easily transported to your yard without extra handling equipment.

Our revolutionary SB series currently offers gantry cranes that range from 15 ton to 100 ton (U.S.) capacity and greater. Our engineering team will work closely with you to ensure that your SB series gantry crane meets your needs and surpasses your expectations, and we'll continue to partner with you as your business moves forward.

STANDARD FEATURES THAT WILL GIVE YOU THE PRODUCTIVITY ADVANTAGE

SB
SERIES

ARTICULATED PIVOT TRUNNION

Shuttlelift's articulated Pivot Trunnion allows the crane's frame to articulate while it travels over uneven terrain without causing structural damage or risking the safety of the load.

PROPORTIONAL CONTROLS

The crane is equipped with fully proportional controls allowing precision movement of all crane functions, resulting in complete operator control.

EASY ACCESS ENGINE COMPARTMENT

Shuttlelift's Easy-Access Engine Compartment allows all routine maintenance points to be easy to reach.

LOW MOUNTED HOISTS

With hoists mounted to the lower side beam, the operator can easily see the reeving of the wire rope and can perform needed maintenance without the requirement of a manlift.

CANTILEVER WHEEL FRAMES

Shuttlelift's Cantilever Wheel Frame design provides increased efficiency if tires need to be serviced or replaced.

WIRELESS REMOTE CONTROL

Shuttlelift's Wireless Remote Control increases operator visibility of the load by allowing the operator to be anywhere around the load or work being performed, improving operational safety and ensuring maximum maneuverability. The remote is laid out in the same format as the backup operator cab controls for an extra measure of efficiency and safety.

OPTIONS THAT BOOST YOUR CRANES PERFORMANCE

ALL-WHEEL ELECTRONIC STEERING

Shuttlelift's All-Wheel Electronic Steering provides maximum flexibility, maneuverability and precision handling while operating in confined spaces. Available steering modes include 2WS 90° Front, 2WS 90° Rear, Crab, Transverse, Carousel and Coordinate.

INCREASED GRADEABILITY

Shuttlelift provides Increased Gradeability through additional wheel motors that allow its gantry cranes to travel over inclined or uneven surfaces. This increases the crane's traveling efficiency, and it allows you to maximize your yard space by utilizing areas once deemed unusable.

ADDED HEIGHT AND/OR WIDTH

At Shuttlelift, we modify the height and width of our cranes to meet specific customer requirements.

MORE **VERSATILE** THAN YOUR CONVENTIONAL OVERHEAD CRANE

Whether you have multiple bays that require lifting capabilities or transporting product from indoor to out, our single beam gantry crane can help improve your return on investment. The possibilities are endless with a SB series crane from Shuttlelift. Contact us today to see how we can solve your lifting challenges.

VS

WE ARE HERE (AND EVERYWHERE) FOR YOU

As a global leader we need to focus on two things— leading and being global. Being there to support our customers in sales and maintenance support is a huge part of our success because it's a huge part of yours. For our customers, genuine peace of mind comes from genuine parts installed by our highly-experience technicians in an expedited time frame. We know that every day you wait for a part may result in a lost day of production, so we've streamlined our parts department to perform to the standard you'd expect from Shuttlelift.

GENUINE PEACE OF MIND WITH SHUTTLELIFT'S CUSTOMERCARE

No one understands your Shuttlelift gantry crane better than our highly dedicated service team of lifting professionals. Trust the experts for comprehensive service.

SUPERIOR SERVICE AND REPAIR ASSISTANCE

Our service team is there to help you maintain and repair your equipment and minimize costly downtime. These highly trained and experienced lifting professionals have been hand-picked to provide exceptional customer service with care and integrity.
